

## CURRICULUM VITAE

# Full-Stack Developer and Graphic Designer

Rovaniemi, Finland

**Edward Stewart**

Edward Stewart is a web developer and a graphic designer who combines creative and technical thinking, focusing on digital services, integrations, and solutions that utilize Artificial Intelligence.

He has vast experience in React, Next.js, and TypeScript development, as well as API and system integrations. Edward built MCP-based AI agent workflows where LLM models control the 3D environment (Blender Python API). Curious, analytical, and experimental in his approach, he utilizes AI-assisted work (“vibe coding”) from ideation to prototyping and validation.
